

## Executive Director – Financial Systems Center

Stevens Institute of Technology created the Financial Systems Center in 2012 to develop interdisciplinary research, educational programs and policy-strategies for advanced financial systems. "Financial systems" is one of the pillars of growth for the university's overall strategic plan. We have supported this initiative with heavy investments in innovative academic programs (undergraduate and graduate) and in cutting-edge technical facilities.

We are now looking for an Executive Director to help us build this enterprise into a world-class center of expertise and thought-leadership in financial science & technology.

The ideal candidate will have broad experience in the financial industry, in-depth knowledge of the current issues and problems arising from the latest technology trends in the industry, and strong networking skills to establish collaborative programs between academia and key corporate and governmental constituencies.

We need a "builder" – someone with an entrepreneurial drive, who can motivate scientific and technical experts and organize successful teams for the prosecution of cutting-edge research programs – and who can reach out successfully to the external financial community. Prior experience in academia is a plus.

We are ambitious. In five years, Stevens aspires to be a premier intellectual and policy-influencing technology-driven institution in this field. We are looking for someone who will share that ambition, and can help bring us to that goal.

If this opportunity excites you, we would like to hear from you. Please send a letter of interest, and a current curriculum vitae or resume, to:

George Calhoun  
Search Committee Chairman  
Room 413, Babbio Building  
Stevens Institute of Technology  
Castle Point on Hudson  
Hoboken, New Jersey 07030
